# Tønder

*Tønder was once an enterprising commercial town and port dealing with cattle especially. Unfortunately the harbour sanded up, and the commerce was stagnant.*

*Thereafter Tønder survived by virtue of a prosperous lace-making industry. About 20.000 lace-makers supplied the wealthy dealers in lace for more than 200 years.*

*In the end of the 18 th century the lace industry died out, lace-making machines took over.*

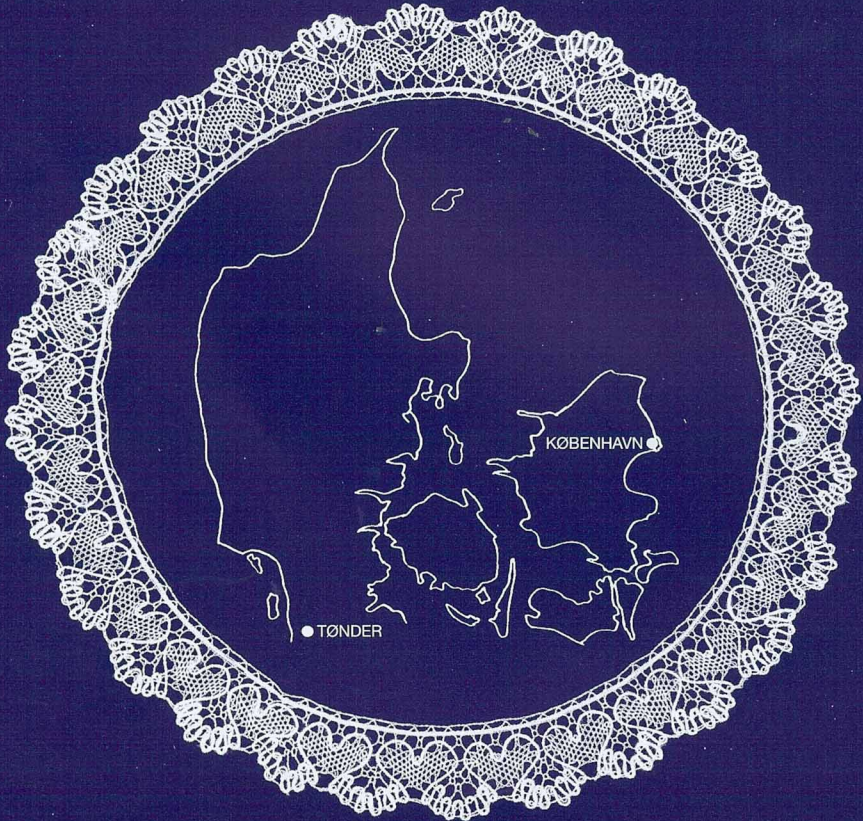

*Tønder is worth visiting because of its many old, beautiful houses, cosy streets, and particular attractiveness. To visit the surrounding marshland and tidal area is a unique experience.*

*Today Tønder is an active commercial town and domicil for several world-fame manufacturing industries.*
